MLG EDITION

Features enhanced tournament grade laser sensor and button switches.

DOUBLE SENSITIVITY

A powerful 32 bit ARM processor allows Sensei to reach up to 16400 DCPI.

YOUR WAY

The most customizable mouse in the world. Whatever and however you want it.

BUILT BY THE BEST

Fnatic, SK, EG, Na'Vi, EHOME, TyLoo. LoL, HoN, CS, SC2, DotA. They were all in on it.

ILLUMINATE

Light up your wheel, CPI indicator or MLG logo. Or turn it all off.

ADJUSTABLE LIFT DISTANCE

Get your own lift distance regardless of surface. Always. You have the authority.

LCD DISPLAY

Via the built-in menu, you can customize on the go - with simply your scroll wheel.

BACKED BY ENGINE

PC gamers will benefit fully from the SteelSeries Engine software.

Bow to the tournament master.

MLG EDITION

The SteelSeries Sensei MLG Edition is the most award winning gaming mouse in history armed to the teeth. With upgraded armaments like a more powerful laser sensor and tournamer

On-board memory means that no matter what championship you travel to, your profiles are loaded directly onto your mouse and ready to use. The black gun metal casing provides a ba

MEET THE SENSEI

Since the release of our first mouse, we have been using Japanese-inspiration in our naming of them. Our mice are built for performance and tournament-style play; Ikari means anger, X

WINNING, IT'S THE WAY OF THE SENSEI

The name fits because everything we ever learned about mice, everything we ever researched, everything we ever discovered, everything that makes a mouse great, is exactly what we l

SIZE AND WEIGHT

- Weight: 102 grams (0.22 lbs)
- Height: 38.7 mm (1.5 in)
- Width: 68.3 mm (2.7 in)
- Length: 125.5 mm (4.9 in)

DOUBLE YOUR SPEED

SteelSeries Sensei MLG Edition can be fast, like really light-speed fast, like faster than the original Sensei for the real speed freaks out there… if you need that kind of speed. Because

Our default CPI range: 1 to 8200 CPI.
Our Double CPI range: 8201 to 16400 CPI.

This feature is particularly useful for people using multiple monitor and similar environments.

BEST-IN-CLASS TECHNOLOGY

Featuring an improved state of the art laser sensor that offers a consistent and reliable performance, the SteelSeries Sensei MLG Edition boasts 10.8 megapixel HD image correlation at

ADVANCED MACROS

Thanks to the support of the SteelSeries Engine software, you can record even extremely long and advanced macros to the Sensei. The macros can be layered and can include keystrol

TO CORRECT OR NOT CORRECT?

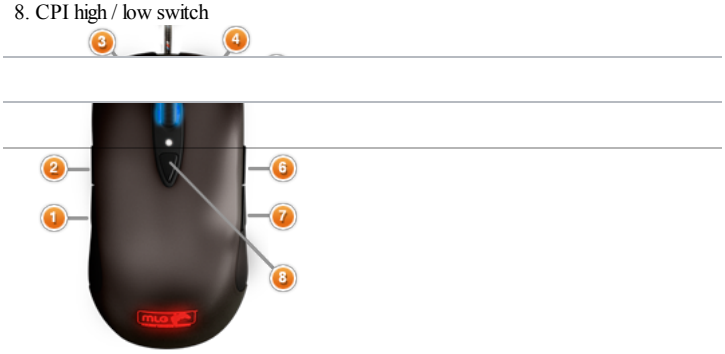
SteelSeries FreeMove eliminates path correction, which makes the mouse predict, correct and make your movement straight. With the SteelSeries Sensei, you can adjust the amount of

Path correction eliminated.

Path correction set to max.

BUTTONS

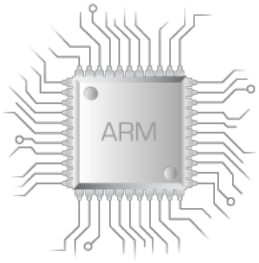
1. Left side button 1
2. Left side button 2
3. Left click
4. Right click
5. Scroll wheel & middle click
6. Right side button 1
7. Right side button 2
8. CPI high / low switch



32 BIT ARM PROCESSOR

The processor in SteelSeries Sensei MLG Edition is a 32 bit ARM processor and it is as fast as the original Pentium 75 MHz processor released by Intel in 1994. That is fast, incredibl

Our industry leading ExactTech settings, like ExactSens, ExactRate, ExactAim and more, are calculated directly on the mouse providing the user with a mouse movement that is comple



STEELSERIES EXACTTECH

Complete customization of the Sensei can be configured through 4 technology features that we're calling SteelSeries ExactTech settings.

EXACTLIFT: ADJUSTABLE LIFT DISTANCE

The Sensei gives you the ability to customize the lift distance. This has a number of practical applications, most importantly it allows you to fine-tune the mouse to your preferred mousep

EXACTAIM: SLOW DOWN AND FOCUS

SteelSeries ExactAim will allow you to be more precise. Headshots anyone? As you slow down your cursor the mouse will decelerate even more allowing you to focus on your target.

EXACTACCEL: MOVE FAST, NO EVEN FASTER

SteelSeries ExactAccel does just the opposite as ExactAim. As you increase the speed of your mouse movement, ExactAccel will accelerate your movements even faster in order for y

---

EXACTSENS: CONTROL THE SENSITIVITY

SteelSeries ExactSens allows you to control how fast your pointer should move by adjusting your CPI in increments of 1 between 1 to 5,700 CPI. This means, the SteelSeries Sensei o

PC/Mac COMPATIBLE

WHY YOU'LL WIN

Will a Sensei make you a badass 1337 n00b-owning gaming hero? Probably not, sorry. A mouse is a tool, like any other tool. Even the very best, most expensive, most amazing tennis

But will a Sensei help you win? Yes, for sure. And that is our promise to you. That is why we built the Sensei line of mice. With second-to-none accuracy during movements, it will give

And the numbers

Frames per second: 12000
Inches per second: 150
Mega pixels per second: 10.8
Counts per inch: 1 – 8200
Double Counts per inch: 8201 – 16400
Maximum acceleration: 30 G
Sensor data path: True 16 bit
Lift distance: 1 mm
Maximum polling: 1000 Hz
